Comment:

The "Islandhundeclub Schweiz" is a very small club within the SKG (Schweizerische kynologische Gesellschaft - Swiss association of cynology).

Unfortunately people who don't like to breed are not interested to join the club.

People who are active in dog sports are often member of an SKG dog club and don't need to be member of the breed society

Summary

2012

- Registered litters: 2
- Puppies: 9; average litter size: 4,5
- Imported and registered puppies: 2 (from Germany). Comment: People who are not interested in breed or exhibition are not interested to register their dogs in the SHSB. So we can't follow up how many dogs with FCI Pedigree lives in Switzerland!

We have only one breeding which "produce" puppies regularly. All breeders follow the IHSC recommendations; not all with the same correctness. The genetic variation isn't always on the first place.
