Summary

Litters registered: 33
Puppies: 158, 85 males and 73 females
Average litter size: 4,78
Average inbreeding: 0,978 %
Imported dogs: 4

Due to covid-19, almost all shows and events were cancelled.

However, it was possible to host:

Three Club Shows with a total of 104 entries.

Five mentality descriptions with a total of 36 dogs.

Our annual Træf – with a lot of restrictions and caution, it was possible to gather 130 persons and 109 dogs for one weekend with unofficial Show, Rally-obedience, obedience, mentality description. However, most of the social events like banquet were cancelled.

From a breeding perspective, the number of litters in 2020 increased with five, compared to 2019 – however, the level are within the range from the previous five years.

The number of x-rayed dogs (HD and ED) were in the high end in 2020, which corresponds well with the high number of puppies born in 2018. Only a small number of dogs are x-rayed for ED, and we do not see a problem with ED in Denmark. Looking at the HD status in Denmark, we are still observing high numbers of C+D+E. The Danish Kennel Club explains the increased number of C-hips with the improvement technology, however in A-hips are still remarkable, and the Danish breedclub are currently trying to investigate the cause of changes in HD-status in Denmark. Investigating the parental status for the litters, almost all parents had an A og B status.

Louise Roer, Chairman
Tove Møller Christensen, Breeding Committee

Statistics overview and comments, shows, descriptions
