Summary 2020

9 litters registered
31 puppies
16 male and 15 female puppies
Average litter size: 3,44
Average inbreeding: 0,759% % (5 generations)
15 puppies imported

In 2020, 9 litters with a total of 31 puppies were registered in Norway. The average litter size was 3,44 puppies, a bit lower than the year before, when the average litter size were 3,75 pr.litter. The average inbreeding percentage was only 0,759 %, a bit higher compared to 2019 (0,358), but very acceptable overall. The Norwegian Kennel Club use 5 generations when they calculate inbreeding and NIHK use their calculations.

Most of the breeders follow NIHK's breeding recommendations, and most of the puppies are sold before their parents have mated. It would be nice to see more of our dogs in breeding, the imported dogs as well. Some breeders work together with NIHK to increase the genetic diversity of our breed.

The breeding committee have used DogsGlobal to check the genetic diversity when checking and recommending dogs for breeding, but first of all we use the ISIC Database and Dogweb.

The appendix contains list with the litters registered in 2020 and the dogs imported in 2020.

Health

The Icelandic sheepdog in Norway is overall a healthy breed.
13 dogs had an eye examination and 32 dogs were tested for HD and 68,75% had HD-status A (9) or B (13). For result C (5) its 15,63 % for D (5) its 15,63% and for E (0) it was 0%.
We would like to see more dogs with eye examination and known HD-status.

We also have 9 individual dogs that we know did PennHIP x-rays in addition to HD x-rays.

5 dogs have done ED x-ray. 4 with 0, and one with 3.

We know about three dogs with allergy.

Five dogs are known/reported to have patella luxation.

Estimated number of Icelandic sheepdogs in your country

	2020

Further comments:

We have no way to estimate the number of living icelandics sheepdogs in our country.

Stud dogs

These dogs have reached, or are close to, the ISIC breeding limit.

Numbers in front of the slash (/) is obtained from the Norwegian database Dogweb. Numbers in the middle are obtained from the ISIC database, and numbers behind the slash (/) are obtained from DogsGlobal.

Males with more than 20 puppies or more than 40 grandchildren, born in 2001 or later:

Hip Dysplasia (HD)

Total number of x-rayed dogs	2020	2019	2018	2017	2016
A	9	7	3	5	3
B	13	11	6	11	7
A+B	22	18	9	16	10
C	5	11	6	3	4
D	5	2	1	4	5
E		1			
C+D+E	10	14	7	7	9
In total	32	32	16	23	19

Further comments:

Method – FCI's rules for x-ray.

Icelandic sheepdog is one of the breeds who have a registration restriction in Norway. The kennel club will only give puppies a pedigree if both parents have known HD-status. If a dog with E-hips is used in breeding, the puppies will get their pedigree, but they can't be used in breeding.

NIHK recommend that only dogs with A, B or C hips are used in breeding. We recommend that a dog with C-hips should be mated with one who has A or B-hips.

Elbow dysplasia (ED)

Total number of x-rayed dogs	2020	2019	2018	2017	2016
Level 0	4	4	1	1	5
Level 1					
Level 2					
Level 3	1				
In total	5	4	1	1	5

Further comments: It's not very common to x-ray the elbows on Icelandic sheepdogs in Norway.

Patella luxation:

Total number of x-rayed dogs	2020	2019	2018	2017	2016
Level 0					
Level 1					
Level 2					
Level 3					
In total					

Further comments: Results from this examination have not been official in Norway. NKK (Norwegian Kennel Club) did start to write patella luxation results in Dogweb, the Norwegian database, in 2013. If Icelandic sheepdogs are tested for patella luxation we will be able to see the results in the database. There is not any statistic for patella luxation, which means that we are dependent on the owners reporting to us about the dog being tested. Not every veterinarian is allowed to write this document, they need to be approved of NKK.

We have heard about four Icelandic sheepdogs with patella luxation, but we don't know what level they have (two are dead). We know about one dog who is operate, with good result.

Eye examinations

Total number of examined dogs	2020	2019	2018	2017	2016
Unaffected signifies (free)	13	18	24	17	14
Cataract					2
Cornea Distrophe					
Distichiatis					
Others (see below)				1	1
In total	13	18	24	18	17

Other hereditary eye diseases:

NO35594/16	Ayak Av Brattalid	19.11.2017	Distichiasis/ Ektopisk Ciller mild level

Statistics overview and comments, shows, descriptions and events

N02992/03	Balder		Cataract
N08311/05	Chiwaz		Cataract
DK03039/2008	Surtsey's D-Draumur		Cataract
S57089/2008	Meester Ridge Geysa		Cataract

Further comments:

Health, optional testing

	2020	2019	2018	2017	2016
BEAR (Hearingdiseases)					
Heart diseases					
Kidney diseases					

Further comments: One dog was in 2015 diagnosed with a low degree Aortic Stenosis (narrowing of the aortic valve, which controls the blood flow from the left ventricle). There have not been reported to be anyone else having the same problem since then.

Mentality descriptions

	2020	2019	2018	2017	2016
Descripted dogs					1
In total					1

Further comments:

Many Icelandic sheepdog owners are interested in MH. But in Norway it is still not common to have any mentality description on dogs, besides for working dogs like German Sheppard and Rottweiler. However, this is becoming more popular, and dog clubs arranging mentality description tests are increasing. Which means the chance of an Icelandic Sheepdog being tested in the future is higher now.

Working abilities (herding) descriptions

	2020	2019	2018	2017	2016
Descripted dogs					
In total					

Further comments:

We don't have any test in Norway to check the dogs herding abilities.

Shows

	2020	2019	2018	2017	2016
Number of shows	20	47	49	43	37
Number of dogs	101	252	238	145	153
In total (dogs)	101	252	238	145	153

Further comments:

In the year 2020 we've all suffered from the corona pandemic, and therefore there have been arranged less shows than previous years, and less dogs have been showed. Despite of the pandemic, there have been adjustments, and we've had icelandic sheepdogs shown in 20 shows in 2020, with a total number of 101 dogs shown. In all probability, it's the same dogs that have been shown in a lot of the same shows, just as it has previous years. We do not know how many individual dogs that have been to shows.

We did not arrange a special show this year.

Events

We did not arrange any events this year.
